INTRODUCTION

OPERON METAVERSE

Operon Origins is a GameFi NFT collectable card game which is to be built by a AAA game studio, Juego, to revolutionise the digital collectable card game industry by merging traditional gaming industry quality standards with blockchain integrations.

Operon Origins aims to revolutionise the collectable card game industry by introducing accessible and challenging gameplay surrounding high-quality NFTs. By pushing the boundaries of competitive NFT games, Operon Origin is a unique opportunity to discover the Operon Metaverse. There are multiple problems within the current blockchain gaming industry. One of these is the incredibly high financial and complex barriers of blockchain games. Operon Origins aims to lower these barriers drastically with an intuitive ecosystem design that focuses on fairness and accessibility.

Operon Origins is an evergrowing massive multiplayer journey for the player, with over 250 chapters to complete allowing dozens of hours of dynamic gameplay. Players can discover the Operon Metaverse while preparing for their upcoming adventures. By utilising a Play-to-Earn mechanism, players get rewarded for their input and playing the game.

Operon Origins utilises visually astonishing NFTs that are tradeable on the Operon Origins NFT marketplace. The ownership of the NFT lies in the hands of the player. Hence, the player is free to transfer, trade, or collect these NFTs.

GAMEFI IS INACCESSIBLE

EXPENSIVE

Blockchain games are notoriously expensive, which is a real barrier for non-crypto currency gamers. Traditional gamers are a significant group of potential investors and consumers. Operon Origins aims to make their game accessible, whereby cards are accessible through zORO tokens obtained by playing the game.
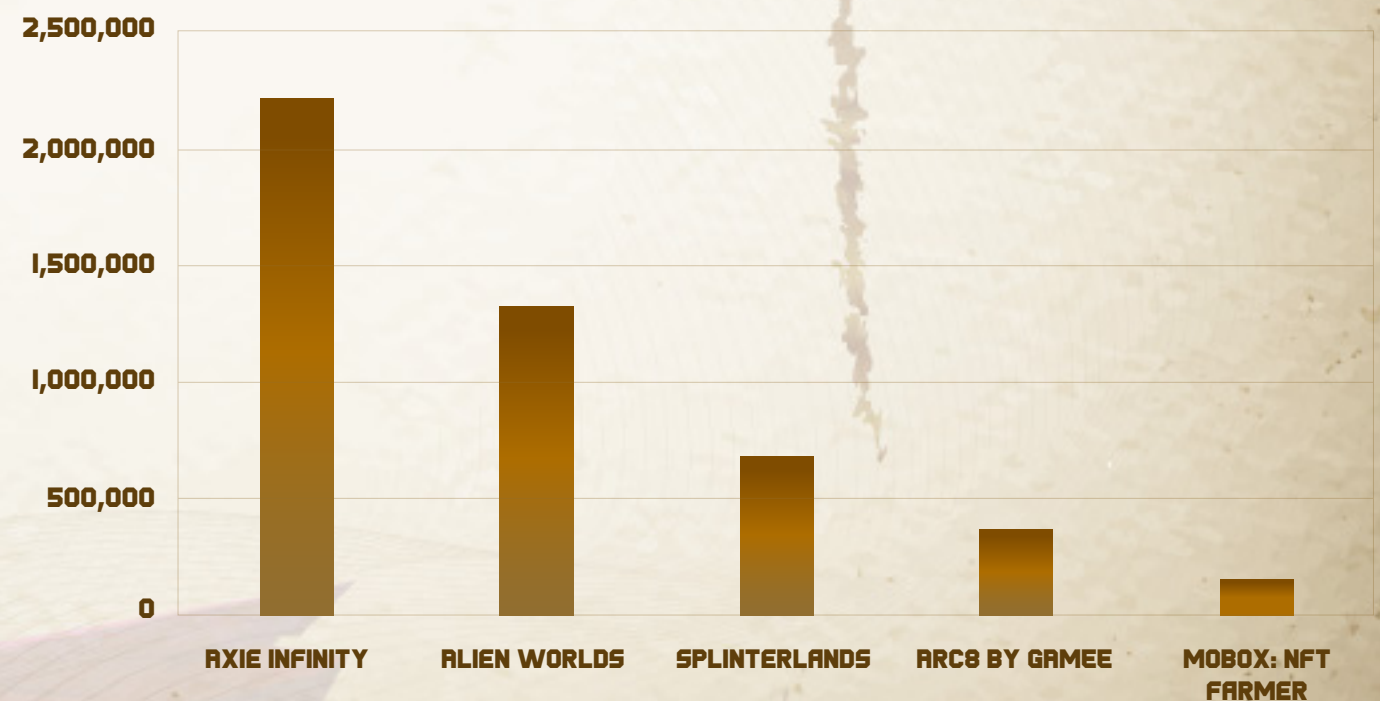

UNFAIR

Blockchain games tend to have ecosystem designs that promote inequality by several ambiguous gameplay features-Operon Origins advocates for a fair game, whereby players are not necessarily underpowered owing to financial constraints.

THE FUTURE OF VIDEO GAMES

The gaming industry is one of the biggest global entertainment industries, with an estimated valuation of 173.70 billion USD and with an expected valuation of over 300 billion USD in 2026. The industry is one of the quickest growing global industries, with an expected compound annual growth rate of 9.64% in the upcoming five years (Mordor Intelligence).

The GameFi industry, tightly linked with the NFT industry, is one of the most popular industries within the cryptocurrency space. Multiple influential traditional gaming studios, such as Electronic Arts and Ubisoft, actively engage with NFTs and blockchain concepts. The GameFi industry has seen tremendous growth over the last few months, with cryptocurrency games having more than 1 million unique players a month.

GAMEFI UNIQUE MONTHLY PLAYERS

Chart with y-axis from 0 to 2,500,000 (in increments of 500,000).

STORY

The story of Operon Origins begins 10,000 years in the future. With time, the human DNA has evolved and created superhumans, the Operons. The Operons are genetically modified humans with inhuman destructive power. The Operons are divided into four powerful affinities: Earth, Fire, Ice, and Magic. The affinities are the driving force of Operons and divide them into powerful pacts.

The Operons are battle-hardened through their previous experiences or sorrowful backgrounds. While every tale is different, the objective for every Operon is the same: Being the ruler of the Operon Metaverse. The Operon Metaverse is chaotic, with Operons battling for prestige and supremacy to ensure that their affinity thrives.

PRINCE XION

A descendant of the early rulers of the realm, when the newest Operon evolutions emerged. Xion's pride makes him believe that he is the Alpha and the Omega of the entire Operon Metaverse. Dawning a dark cape and riding his dragon, Grekherus, Prince Xion is one of the most powerful Operons in the metaverse.

SHEENA

Sheena was raised as the daughter of King Kyron and Queen Sirius, the rulers of the Mahagama Forests. Her biological parents are unknown, as she was abandoned on the outskirts of the forest during a new moon. Sheena is a proficient archer and is seen as the most infallible and skilled marksman of the Operon Metaverse. She can take out any opponent with her deadly and impeccable aim.

CATRESS

Not just a pretty face, she is feisty and dangerous with her nails and daggers. Catress is one of the fastest to destroy enemies and comes from a genetically evolved feline generation of Operons.

JACK

Cowboys are not your typical Operon - they possess an incredible accuracy that makes them the perfect marksman, with any projectile-based weapon. On the outside, Jack looks like your typical cowboy, biting on a toothpick and never losing a fast draw duel to anyone. But inside, he is fiercely loyal to those around him, and will always stand on the side of justice and right.

WRATH SABER

Saber of Justice, who descends his wrath upon the evil, Wrath Saber is the antagonist who values others above himself. Gifted with a magical Saber, he has one of the highest attack statistics in the game and can destroy an entire team of creatures.

GRAY

Were the werewolf Operon born as an animal or a human? No one really knows - but straddling the murky line between the two worlds has given Gray a refreshingly-rounded worldview and logical understanding of survival and society. Wise beyond his gruff canine exterior, and exceeding the peak conditioning capable by any human being, Gray is the perfect specimen of a werewolf.

GLINTER

The noblest one from a tribe of mech-like Operons, Glinter is kind, big-hearted and loyal to a fault. No-one knows if these robot Operons were birthed, created, or dropped in from another world - but what is in no doubt, is how this little (compared to other mech Operon) companion will stay with you until your last moment, defending you with his built-in artillery and flight gear.

GAMEPLAY

Operon Origins is a collectable card game, whereby players can collect NFTs and utilise these to battle with other players in a lively metaverse. Players can complete over 250 chapters, which allows for dozens of hours of dynamic and challenging gameplay. By adding new content, features and NFTs, Operon Origins will continuously evolve and grow, and this dynamic aspect will allow players to experience high-octane battles and epic adventures.

REWARDS IN zORO
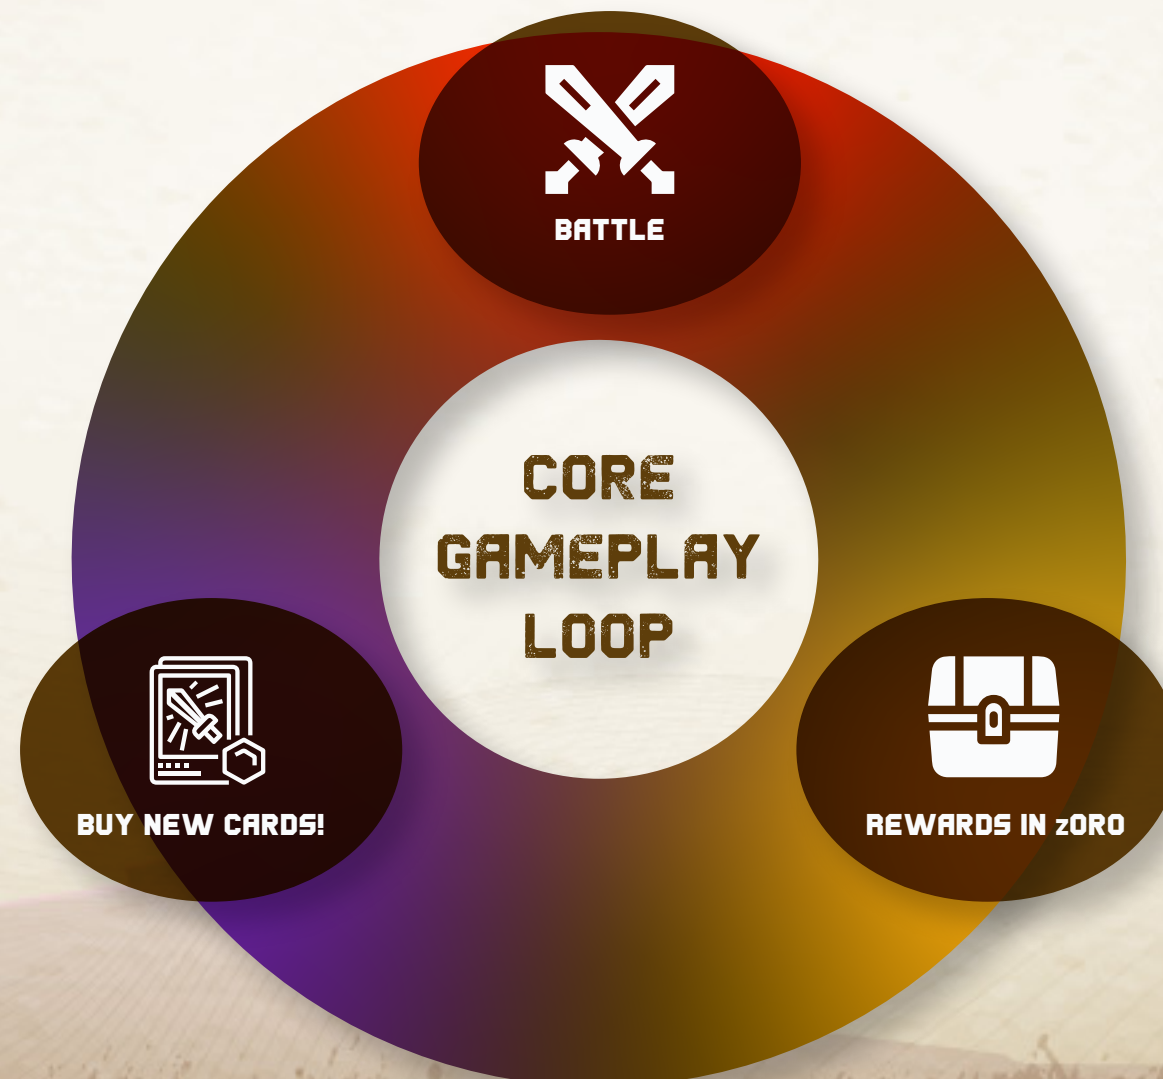

AFFINITY

Operons are divided into four affinities: Fire, Earth, Ice, and Magic. Each affinity has its strengths and weaknesses, by means of which affinities can counter each other and strike mercilessly. The affinities are one of the strategic and authentic elements of Operon Origins. Players can strategise their set of Operons based on their affinities and the expected affinities of their opponents.

ECOSYSTEM

NFT'S DISTRIBUTION

The collectable NFTs of Operon Origins are categorised by rarity. The strength of the NFT is influenced by its rarity; therefore, NFTs with legendary rarity are the most powerful cards in the Operons Origin metaverse. Initially, only 5,000 NFT are available; however, more NFTs will become available in the future.

OPERON ORIGINS
NFT MARKETPLACE

Operon will develop an NFT marketplace where players can trade their NFTs. The NFT marketplace will have an intuitive design; making it easy to use and accessible to any player. The means of payment on the NFT marketplace will be ORO tokens, the native token of the Operon Origins ecosystem. The NFT Marketplace will also function as an auction place for limited edition NFTs. The marketplace has a 5% trading fee, which will be used for marketing and partnerships to create ecosystem value.

```
NFT MARKETPLACE ----> 5% TRADING FEE ----> PARTNERSHIPS ----> VALUE CREATION
                                       ----> MARKETING    ---->
```
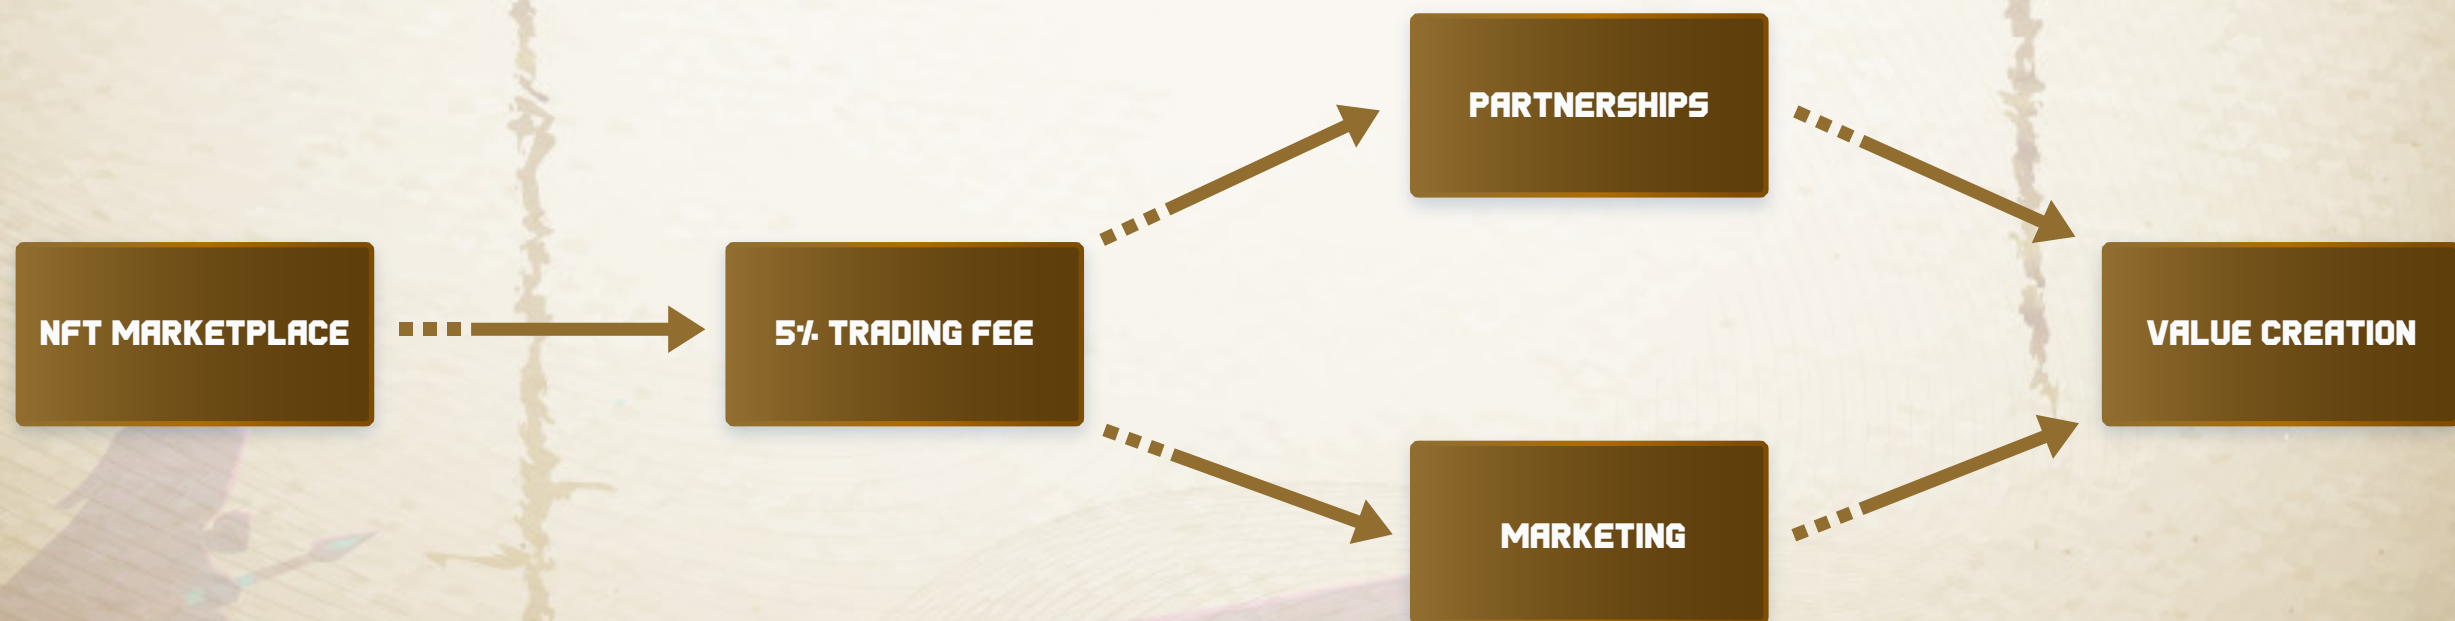

ORO TOKEN

The Operon Origins (ORO) token is the native utility token of the Operon Origins ecosystem, which will be available on Decentralised and Centralised exchanges. Initially, ORO tokens are being used to purchase NFTs; however, this will change after the first 5,000 NFTs, and zORO tokens will be used after that. The ORO tokens will be used as means of payment for the NFT marketplace.

zORO TOKENS

The zORO tokens are non-tradeable tokens that can be obtained through staking ORO and playing the game. The utility of zORO tokens is the ability to buy NFTs.
